

Abuta

Species abuta in ventis in Hardy Bay Carrot Bay St. Thomas

ria sepieni Abuta foliis ovato-oblongis trinerviis nervis tomentosis
Abuta sepiensis foliis ovatis subtus villosis Aubl. fl. Gu. pag.
610. tab. 250

Abuta scandens Barr. fruct. Equin. pag. 1.

Habitat in Guayana
Frutex ramis tortuosis scandens. Ramuli tomentosi foliosi
petioli tomentosi incani folia ovata oblonga palmata acumi-
nata subcordata integerrima trinervia nervis tomentosis
incanis, subtus tomentosa univesa. racemi axillares pedun-
culis pedicellisque villosis.

folia ovata vel ovato cordata, quinque pollicaria quinque nervis
vea, acuminata, nervi supra incani, axilla subcordata, subtus villosa
lobata, venosa. Rami tomentosi habet 4 flores non odorat

Prothia

1. cruci P. foliis ovatis serratis pedunculis terminalibus multifloris
2. theiformis P. foliis lanceolatis serratis, pedunculis axillaribus subsili-
tariis unifloris
3. integrifolia P. foliis oblongis emarginatis subsili-
tariis, pedunculis
axillaribus aggregatis unifloris.
