

Julia

cord-folia Erythrorhiza. Richard.

Habitat in Carolina Richard.

Folia radicalia, longe petiolata, pollicaria, cordata subrotundo cor-  
data, ~~in~~ <sup>in</sup> ~~aequaliter~~ denticulata, 9 nervia; ~~ter~~ <sup>ter</sup> ~~er~~ <sup>er</sup> ~~venis~~ <sup>venis</sup> ~~simi~~, <sup>simi</sup>, ~~obscure~~  
venosa. Petioli foliis triplo longiores, subtiles subteretes; supra  
pubes exarati, glabri. Scapus erectus, pedalis, teres, simplicis bimis,  
laxis, Flores micromasi, parvi, alterni. Bractea minuta ad basin  
singuli pedicelli. Calyx subcampanulatus, <sup>persistens</sup> quinque partitus: lac-  
nis lanceolata, acuta. Petala quinque, calyce duplo majora,  
subspathulata-oblonga, basi mediante <sup>nectario</sup> staminibus <sup>ternis</sup> in <sup>sub</sup> tubo con-  
necta. Stamina quinque, petalis connata in tubo cylindrico Necta-  
rium a filamentis quinque in tubo cylindrico, connatis, corolla bre-  
vius, apice decem fidur. lacinis alternis longiores. Anthera unia  
in singula lacinia breviora nectarii. Germen superum, stamini-  
bus brevior, subglobosum, ~~calyce~~ stylus brevis bimis. Stigma subo-  
vato-copitatum, obtuse subtrilobum. Saepe Metello  
Capsula quadriloculari, polysperma Richard.

homatodesalvia foliis cordato ovatis rugosis tomentosis, calycibus hispida, radice tuberosa
