Hedwigia

1. balſamifera H.
2 – dioica
3 – pubeſcens

dioica et pubeſcens quare ſub nomine Ticea extat Am: et in Syſtemate

balsamifera Hedwigia
~~altissima Icica. Aubl. fl. Gui. pag. 342 tab. 132.~~

Habitat in Montserrat Dr ~~Ryan~~, in insula St-Crucis legit Dr West

Rami teretes, glabri.

Folia alterna vel in apice ramorum, petiolata, pedalia, pinnata cum impari, trijuga. Foliola breviter petiolata, opposita, quinquepollicaria, inferiora minora, sesquipollicem lata, oblongo-lanceolata, acuminata, acuta, integerrima, venosa, utrinque glabra.

Petioli triquetri, glabri, purpurascentes; supra plani fere laeves ~~obsolete striata~~ subtus striati: partiales semiunguiculares.

Panicula ramum ~~Pedunculi~~ infra folia, Pedunculi approximati, alterni, glabri, striato-angulati, purpurascentes, longitudine fere foliorum: partiales oppositi: pedicelli ultimi triflori; flores pedicellati

Calyx monophyllus cyathiformis, parvus, quadridentatus, glaber.

Corolla tetrapetala, calyce duplo longior: Petala oblonga, obtusa.

Stamina filamenta vix ulla, receptaculo inserta. Antherae oblongae, parvae, corolla breviores

Germen pyramidatum, longitudine staminum, glabrum, basi octo crenatum. Stylus nullus. Stigma sessile acutum

243

Corolla primum monopetala videtur, demum vero in quinque petala distincta resolvitur, et stamina omnino receptaculo inserta sunt. Aubletii Icica huc pertinere videtur et [arbor] ~~planta~~ jam descripta, specie [tota] non differt ~~videtur~~ ab Icica altissima, obstat vero capsula baccata Icicae, de qua tacet Sw. asserit vero Dr Ryan capsulam hujus materiam resinosam continere, ideoque Hedwigia genere ab Icica non differt.

1 balſamifera Hedwigia Schw. prodr. p. 62.
Bois cochon Nicol. h. St. Doming. 169.
Habitat in Hispaniola ♄
Rami teretes ~~cinerascentes~~ punctati. minutiis cinereis adspersi. Folia petiolata alterna, impari pinnata, ſemipedalia, 3juga. Foliola ~~ovata~~ opposita petiolata, ovata, acuminata glabra, venoſa, membranacea tripollicaria, undulata, glabra. Petiolus ſupra planus, ſubtus convexus. Panicula terminalis magna diffuſa. Pedunculis alternis ſpithameis compreſſi. pedicelli ultimi oppoſiti. Calyx campanulatus parvus glaber quadridentatus. Corolla tubuloſa, calyce duplo ~~longior~~ ~~craſſiuſcula~~. corolla ~~brevior~~ duplo breviora Laciniis oblongis obtuſis. Stamina tantum 7 inveni filamenta brevia, receptaculo inſita? anthere oblongo germini adpreſſo. Germen ovatum acutum ſulcatum longitudine ſtaminum. Stylus nullus

Arbor altiſſima.

altissima Tecca foliis lanceolato-ellipticis, racemis axillaribus

Tecca altissima; foliis amplissimis, impari pinnatis; fructu racemoso

Habitat in Sylvis guianæ

Arbor altissima. Folia alterna, impari pinnata bijuga pedalia et ultra. Foliola opposita brevissime petiolata semipedalia acumine semipollicari terminata, integerrima, venosa, glabra

Capsula subovata magna, bi-3-4-6 valvis Valvulis carnosis extus verrucosis rufescentibus. Semina ossicula duo, 3. 4. nigra pulpa alba dulci obvoluta
