1. Tripastata M.

Tripodista Modesta.

Modesta. Rhed. Mat. S. p. 39. t. 20

Modesta fructu majore, flore ex albo flavo escente Herm. prodr.  
354. Lin. fl. Zeyl. n. 591.

Consolida indicus maximus capreolatus. Tuberosus, folis profundi-  
entibus s. Tripodisti Herm. Zeyl. 63. Burm. Zeyl. 72.

Les passoni s. p. unius, quinquefido folio, primus s. s. p. unius, fructu  
rotundo Breyn. prodr. 8. p. 48.

Habitat in India Orientali. König

Caulis scandens, angulatus, striatus, glaber. Folia petiolata,  
alterna, bi s. Tripodistiana, trinaria, <sup>et unum</sup> sup. utrinque glabra, sub  
tus venosa, tripartita: laciniis, squales, lanceolatis, <sup>acuminatis,</sup> integerrimis  
vel subdentatis, intermedia basin versus angustata, lateralis  
interdum extrorsum lobo acuta. Glandula utrinque magna fere  
ad insertionem petioli et alia ad singulum binum laciniarum.  
Petioli sesquipollicares. Pedunculi axillares, solitarii, petioli lon-  
giores, in cirrhum simplicem desinentia: partiales plerumque  
quos, seta superne in pedunculo communi, alterni, pollicia-  
res, approximati. Præterea minuta ad basin partialeum. Ho-  
rta

viscosa Salvia, foliis <sup>cordatis serratis</sup> oblongis obtusis puberulis crenatis viscidis, <sup>verticillis remotis</sup> floribus verticillatis, bracteis cor-  
data acuta. T. V. p. 69. g. Haecq. Icon. rar. T. 14. Missill. 2. pag. 320  
~~Habitat in Italia~~

res tres, alterni, pedicellati. Calyx monophyllus, ~~obtusus~~ subiampannatus

tenuis, coloratus, venosus, quinquefidus: laciniis lanceolatis. Corolla  
petala 5que, basi calycis inserta, linearia, calycis ~~longitudine~~ <sup>longitudine</sup> superne  
margine piloso. Filamento quinque, brevissima, basi calycis inserta. An-

~~theca~~ <sup>filamentum</sup> ~~lineari~~, erecto, longitudine calycis. <sup>pedicellatus</sup> ~~German~~ <sup>subpedicellatus</sup>  
~~tum~~, oblongum, <sup>in</sup> ~~stylis~~ <sup>nullis</sup>. Stigmata 3na. Capsula globosa,  
<sup>in calice</sup> ~~attenuata~~.

La Martii Modello bracteata minime hujus generis, accedit potius  
ad Archosanthem. An Corolla potius nectarium et Calyx corolla diuin-  
dur?
